EXPERIENCE

Software engineer
eDreams

📅 October 2023 – Ongoing   📍 Madrid, Spain

- Working with Java 11, JAX-RX, Oracle and other technologies to develop a robust backend on a modern microservices platform
- Collaborating in a high-performing, customer-centric product development team of 7-10 members, focusing on innovative solutions
- Actively contributing to daily deployments, emphasizing clean code, SOLID principles, and TDD
- Utilizing powerful monitoring tools like Datadog, BigQuery, and Graphana to ensure platform performance
- Engaging with top-tier development tools, such as Google Cloud, Jira, Git, and more, for efficient software development and monitoring

Back-end developer
Minsait

📅 January 2023 – October 2023   📍 Madrid, Spain

- Developing microservices using Java Spring Boot
- Developing and maintaining software using Java Spring Boot and PostgreSQL
- Designing and coding database tables to store the application's data
- Backend development, deployment, and scalability using Docker, K8s and AWS
- Designing and developing integration tests using Java Spock Framework
- Tracking issues and version control using Git

Consultant
KPMG

📅 March 2022 – December 2022   📍 Madrid, Spain

- Perform low-code development with Microsoft's Power Platform-tools (Power Apps, Power Automate, Power BI, and Power Virtual Agent)
- Customization of applications through the use of scripts, Azure Functions and/or Plugins
- Microsoft PCF development with React
- Configure the different technological solutions of Microsoft Dynamics ERP and CRM
- Develop functional documents of the proposed solutions and training documents for end-users

Software engineering intern
AINIA

📅 February 2021 – June 2021   📍 Valencia, Spain

- Software development using Java Spring Boot
- Preparation of technical and research documentation
- Development and maintenance of web services
- Development of R+D+I activities
