EXPERIENCE

Software Engineer
eDreams ODIGEO

📅 October 2023 – Ongoing   📍 Madrid, Spain

- Developing and maintaining Java-based JAX-RS microservices for the backend of the application
- Designing and maintaining tables in Oracle DB NoSQL for Big Data information
- Using monitoring tools such as Datadog to ensure platform performance
- Using messaging platforms like Apache Kafka to share information between different sources and users
- Testing applications by creating Unit Tests with JUnit and Mockito, and conducting A/B Testing
- Being in charge of the full development cycle end-to-end with tools like Docker, GCP, Jenkins, Jira, and Git

Back-End Developer
Minsait

📅 January 2023 – October 2023   📍 Madrid, Spain

- Developing microservices using Java Spring Boot
- Developing and maintaining software using Java Spring Boot and PostgreSQL
- Designing and coding database tables to store the application's data
- Backend development, deployment, and scalability using Docker, K8s and AWS
- Designing and developing integration tests using Java Spock Framework
- Tracking issues and version control using Git

Consultant
KPMG

📅 March 2022 – December 2022   📍 Madrid, Spain

- Perform low-code development with Microsoft's Power Platform-tools (Power Apps, Power Automate, Power BI, and Power Virtual Agent)
- Customization of applications through the use of scripts, Azure Functions and/or Plugins
- Microsoft PCF development with React
- Configure the different technological solutions of Microsoft Dynamics ERP and CRM
- Develop functional documents of the proposed solutions and training documents for end-users

Software Engineer Intern
AINIA

📅 February 2021 – June 2021   📍 Valencia, Spain

- Software development using Java Spring Boot
- Preparation of technical and research documentation
- Development and maintenance of web services
- Development of R+D+I activities
